# PDU Mounting Kit

User Guide

Bracket Installation:

Select the mounting kit you are installing below. Use the front side instructions to secure the brackets to the PDU. Use the back side instructions to install the PDU on the rack.

Slide Rail Mount	Button Mount	Side Panel Mount
Step 1 - Turn the PDU over, align the top center hole, and screw the slide rail to the PDU.	Step 1 - Turn the PDU over and screw the two round spacers to the center at each end of the PDU, as shown below.	Step 1 - Using the center holes, secure the mounting brackets to both ends of the PDU with the screws provided, as shown below.

Screw

Step 2 - Push the sliding rail to expose the second hole and tighten the second screw.

Screw

Push
Slide

Step 3 - Repeat at the other end of the PDU.

Part No. PAPE-1205-B00G

PDU Mounting Kit

Rack Installation:

Use the instructions below to secure the PDU to a rack with the brackets installed on the front side of this guide.

Slide Rail Mount	Button Mount	Side Panel Mount
Step 1 - Have one person hold the PDU and brackets flush against the rack, and have a second person secure the top bracket to the rack using two screws.	Step 1 - Screw the mounting brackets to the rack at a distance that equals the round spacers on the PDU.	Step 1 - Hold the PDU flush against the side panel and secure the brackets to the rack using two screws at each end, as shown below.

Rack   PDU

Screw Driver

Step 2 – Slide the bottom bracket all the way up on its rail, so that it's in the same position as the top bracket, and then secure it to the rack. This will allow the PDU to slide up and down in unison on the rails once it's secured.

Button Mount (continued)

Step 2 - Fit the round spacers into the center of the mounting brackets to secure the PDU to the rack.
